WEATHER VANES

"The complete unit has an arrow and ornament at the top with N-S and E-W directionals. They are made of aluminum and are available in 24", 30" and 40". The standard unit shipped has a 3/4" threaded mast base designed to be installed at the top of a Plyco cupola. Optional masts are the clutch base (installed directly on a conventional roof) and the flange base (designed to be installed on a flat surface).

For a listing of available weather vanes, see the detail price pages. Other weather vanes are available for special order. Additional charges and lead times may apply."
