VENTING OPTIONS FOR ALL
BUILDING TYPES AND SIZES

WHY RIDGE VENTS?

SUPERIOR BUILDING VENTILATION

MW100-25

- 3" above roof peak, 10' vent
- 2 3/4" throat with a flange and 14 1/2" overall width
- Provides 30 square inches of free area per lineal foot - ideal for attic ventilation or the entire building
- Free air area tested

MW100-35

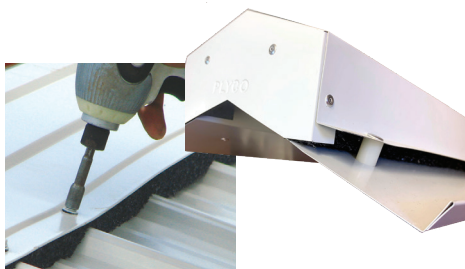

- 4.5" above roof peak, 10' vent
- 3 1/2" throat with a 2" flange and 13" overall width
- Provides 36 square inches of free area per lineal foot - ideal for large attic or entire building ventilation
- Free air area tested

MWE LOW PROFILE

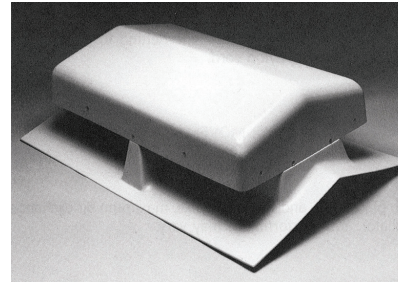

- 2 1/2" throat, totally unrestricted for easy air flow up and through the vent
- 12" overall coverage per linear foot
- 1/2" continuous ventilation space per side
- 29 ga. prepainted steel

MWE-Q LOW PROFILE

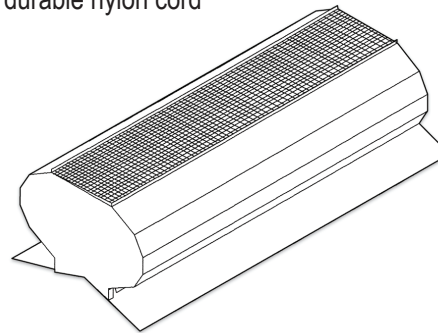

QUICKVENT +plus

- Easy installation with pre-installed hightack adhesive
- Comes in 2"x10' lengths
- Non-wicking, highly pliable with superior airflow
- Keeps out rain, snow, pests and insects

AIR FLOW RIDGE VENTILATOR

- Molded fiberglass construction for corrosion resistance
- Included polyethylene netting to prevent bird infiltration
- Vents with baffles are controlled by a durable nylon cord

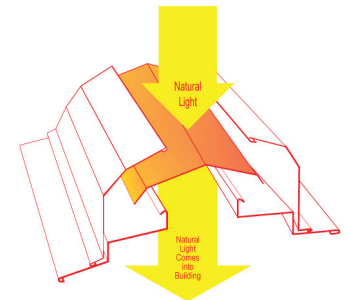

CRV-904-910

- 4' and 10' lengths
- 9" throat
- Top 1/2" bird screen with water diverter system
- Operating damper available in 4' only

Plyco manufactures and distributes a variety of ventilation products designed to provide air-flow to meet your requirements.

Various building components and products are available from decorative cupolas to ridge vents with anywhere from 12 square inches to as much as 108 square inches of free air space per lineal foot.

We also offer wall vents and louvers. Most of Plyco's ventilation products are available in a wide variety of colors to perfectly match your building.

FMW100-35

- 4.5" above roof peak, 10' vent
- 3 1/2" throat with a 2" flange and 13" overall width
- Designed for large attic or entire building ventilation such as in horse, cattle or poultry buildings
