

# CONCRETE WEDGE ANCHORS

**Drop-In Anchors**

Also known as stud anchors or concrete bolts, wedge anchors offer a strong, durable, and permanent solution for securing materials and equipment to solid concrete surfaces.

These fasteners feature a mechanism on the end of the bolt which expands during installation, “wedging” itself into the concrete.

Perfect for securing racking in a warehouse, equipment in a manufacturing facility and aluminum carport structures to a concrete slab.

Choose from steel zinc, 304 and 316 stainless options.

See other side for available sizes.
